

**DWR Municipal Water Quality Program Annual Meeting  
Day 2 Tour of Contra Costa Water District Facilities  
July 31, 2014**

Each participant will need to have a hard hat and a safety vest, and wear sensible shoes for walking through a construction area. Some safety equipment will be available to lend, but if you have your own it would be very helpful if you bring it with you. Steel-toed shoes are the preferred footwear. Hiking boots or any other rugged boot with a reinforced toe would do. If you do not have any kind of heavy duty boots or shoes, any closed-toed tennis shoe can be worn, but safety toe covers must be borrowed from the facilities being toured, and these are in very limited supply.

- 8:00**            **Check In & Board Vans**—DWR West Sacramento Office
- 8:15**            **Depart West Sacramento**
